

BECOME WATER EFFICIENT

LCRA and its customers offer rebates for businesses, industries, schools, hospitals, churches and other institutions to help implement new water-saving equipment and practices.

WATER AUDITS

A water audit can help evaluate your water use and make you aware of any necessary repairs. Water audit rebates up to \$125 per hour for outdoor audits (not to exceed \$2,000), or up to \$125 per hour for indoor and outdoor audits (not to exceed \$5,000) are available. Pre-approval by LCRA staff is required.

WATER-SAVINGS TECHNOLOGY

Install water-savings technology, such as rainwater harvesting, cooling tower recycling or commercial ice machines, and receive a rebate of 50 percent of cost, up to \$20,000. A water audit and LCRA staff approval are required.

For more information on water audits or water-savings technology rebates, contact LCRA staff at WaterSmart@lcra.org.

WATERSMART REBATES

WaterSmart rebates to help save water indoors are available for up to \$100 per toilet and urinal replaced with water-efficient models and up to \$65 for high-efficiency spray rinse valves.

Rebates of 50 percent of the total cost, up to \$1,500 per system, are available for:

- Up to \$5 per pressure-reducing head or nozzle.
- Up to \$100 per pressure-reducing valve and in-line regulator.
- Up to \$900 for soil moisture sensors.
- Up to \$20 per rain sensor.
- Up to \$100 for pre-approved WaterSense smart controllers.
- Up to \$50 for aeration equipment rental or contractor costs.
- Up to \$400 for compost and mulch (no activated sewer sludge).

Apply for the rebates at WaterSmart.org/rebates. Applicants must receive water from one of LCRA's water customers and are required to submit an IRS W-9 form.

SAVE WATER AND MONEY

Outdoor irrigation systems account for more than half of all the water used during hot summer months. Much of this water is wasted due to poorly maintained equipment or incorrectly programmed controllers, which can lead to overwatering. Using too much water wastes resources and creates landscapes more prone to diseases and pests.

The Lower Colorado River Authority's WaterSmart Rebates program can help offset the cost of a water audit, implementing water-savings technology, upgrading irrigation systems and maintaining landscapes to help you save water and money.
